PLANT INVESTMENT FEE INFORMATION

A Plant Investment Fee (PIF) of \$6,500.00 for a residential sewer connection into the main or lateral sewer has been established by the Board of Directors and shall be paid in advance of connection. One PIF is required for each residential unit. **Please contact the District for information for any commercial PIF.**

THIS PIF WILL EXPIRE TWO YEARS FROM DATE OF PURCHASE.
If the tap is not made and used within two years, you must pay another PIF or you must pay half of the regular monthly service charge. You will **not** receive any credit for the previously paid fee.

Taps can be made by a licensed plumber or any contractor. The tap must be made while an employee of the District is present to inspect the entire tap connection process, from the beginning to the end.

Failure to call the District and have a District employee present to inspect the tap process will result in the tap being dug up at the owner's or contractor's expense.

The tap is covered by a one year warranty period by the person making the tap.

NO FLOOR DRAINS ARE ALLOWED IN ANY PRIVATE GARAGES OR OUTBUILDINGS. Fees or fines resulting from non compliance with the State of Colorado due to substances being put down a floor drain will be the responsibility of the homeowner or business owner.

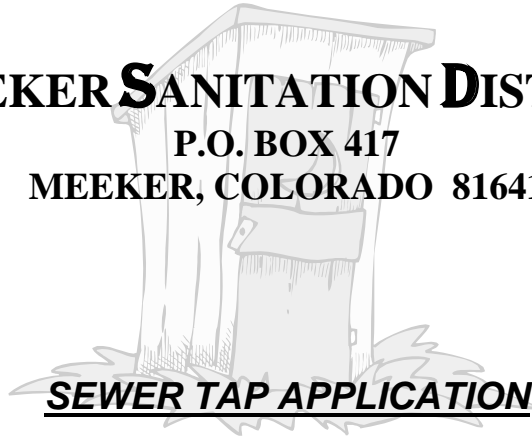

A set of building plans is required prior to any construction or at the time the PIF is paid, whichever is first. District employees will inspect garages and outbuildings for floor drains.
